hanalei-fins.surf

HRD-KORE is the name for our line of RTM molded composite fins. These fins represent top of the line molded fins for the discerning surfer.

Featuring dual carbon bases, hex cores, and fiberglass skins, with either polished or matte finishes.

Our extensive range of fins feature many unique designs, representing some serious out of the box thinking. Most of the templates feature our inside hollow foil technology, for increased performance.

New for 2020 we are also introducing some of our new XLR8, SK8, and 4Q series of fin designs. These designs represent the pinnacle of our PHAT FOILS and FLIP TIP design innovations. They incorporate all of our testing and refinements over the last year into three new and exciting designs.

The full range is available with either GEARBOX or DUAL TAB bases. Selected templates are also available with FUTURES bases, either *deep* or *shallow*.
